# Who we are

**Working Group**  
Teachers

**Extended Group**  
Teachers + Representatives of local agencies (Province of Treviso, ARPA, Treviso tecnologia)

Network for Safety in schools

**Environment Team**

## What we do

We aim to be a reference point for schools regarding the environment and energy saving.

We aim to be a link between schools and local area.

We aim to bring out environmental working at school, making it visible at public events.

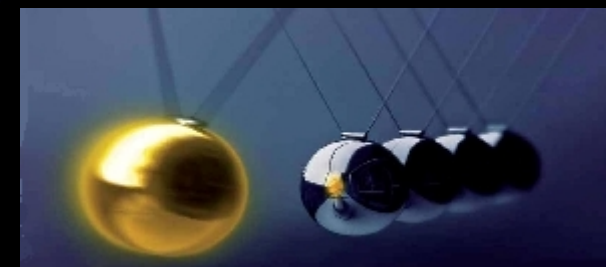

# What we do

Will be consolidated by:

A round table including members of the Extended Group for discussion and debate of proposals.

Proposals for projects in schools with an environmental theme.

Active learning process guided by a network tutor

# What makes us different

Quality and stability of the organisation  
(large number of school network members)

An organisation which could help schools to get in contact, to encourage communication, exchange ideas and share experiences.

Operative working proposals, to be replicated in other situations, in order to make better use of resources and avoid waste

**A network consisting of schools  
for schools!**
